The CALFED Bay-Delta Program welcomes your participation. Please use the space below for your written comments (attach additional sheets if necessary).

Comments:

California's Mediterranean climate is represented on only 2% of
Earth's surface. Much of the world's well watered Mediterranean
lands have already been removed from production. We must
find ways to both maintain productivity in this Agricultural
'paradise' and enhance environmental aspects which have been
degraded. We must consider enhancing storage capabilities.
Why are we not controlling urbanization as well. Urbanites are
consuming the cheap food products which require so much water.
